Engineer with management experience, specializing in modernizing legacy data infrastructure and building developer-friendly systems. Track record of replacing fragile stacks with observable, reliable platforms — and building data-intensive products. Top 1% performer across roles.

Experience

Department of Health, Abu Dhabi (Public Sector) *Senior Staff Data Engineer*

Abu Dhabi, UAE
Aug 2025 – Present

- Leading data engineering and platform team to maintain scalable and reliable infrastructure delivering timely, accurate, and consistent data to maximize Abu Dhabi population health outcomes
- **Tech Stack:** Spark, Databricks (DQX, SDP), Delta Lake, ADLS, MSSQL, Oracle, FHIR, Kubernetes, Azure

Majid Al Futtaim *Senior Engineering Manager*

Dubai, UAE
Sep 2023 – Aug 2025

- Rebuilt identity graph linking 75M customer records across 14 businesses, paired with a feature store to serve martech, fintech, and customer-facing products
- Led core data engineering practice, improving data quality, pipeline reliability, and observability across all data products and infrastructure
- **Tech Stack:** Spark, Splink, S3, Vertica, DuckDB, Airflow, DataHub, Kafka, Argo Workflows, Kubernetes, AWS

Engineering Manager

Sep 2021 – Sep 2023

- Led a team of 10 to build a central business intelligence platform (Connect) for MAF, enabling internal tooling, market trends, competitive benchmarking, and business performance tracking
- Built internal MarTech/AdTech automation product to consolidate and standardize marketing workflows across MAF's retail ad network
- **Tech Stack:** Spark, Cube.dev, S3, Vertica, PostgreSQL, Airflow, Node.js, React, ArgoCD, Kubernetes, AWS

Lead Data Engineer

Jun 2019 – Sep 2021

- Owned central data infrastructure for MAF: integration with 30+ sources/sinks, data observability, and management of databases, data lake, reporting, and event-bus infrastructure
- Scaled team from 5 to 11 engineers over 2 years, building a Data Engineering and Operations team supporting flagship loyalty, marketing, and operations programs
- Built an internal marketing platform serving 35M customers with 1200+ attributes, enabling campaign-specific audience creation with sub-second latency
- **Tech Stack:** Spark, S3, Vertica, PostgreSQL, HDFS, Airflow, Jenkins, Docker Swarm, AWS

Mu Sigma Inc. *Decision Scientist, Apprentice Leader*

Bangalore, India
Jun 2015 – Apr 2019

- (United Airlines) Optimized recommender (grayboxing Oracle RTD), delivering a 30% lift in yearly revenue
- (Tesco) Built data and platform infrastructure for retail pricing and inventory management
- (MAF) Built backend and data infra for an internal employee application serving 46K employees
- (MAF) Built a configuration-based ETL framework on on-prem Hadoop infra (140 pipelines, 10TB daily volume, 15 data sources)

Education

PES Institute of Technology *Bachelor of Engineering - Electrical and Electronics*

Bangalore, India
Jun 2011 – Jun 2015

Skills

- **Domains:** Product Engineering, Data Engineering, Machine Learning, Business Intelligence, Platform & Infrastructure
- **Languages:** Python, Shell, SQL (proficient) — Scala, Go, JavaScript, TypeScript, Rust
- **Data Stack:** PostgreSQL, SQLite, Vertica, Elasticsearch, DuckDB, Spark, Delta Lake, Iceberg, Databricks, S3, ADLS, Confluent Kafka, Cube.dev, Trino, Airflow, Superset
